AUSTRALIA'S CHANGING DAIRY INDUSTRY

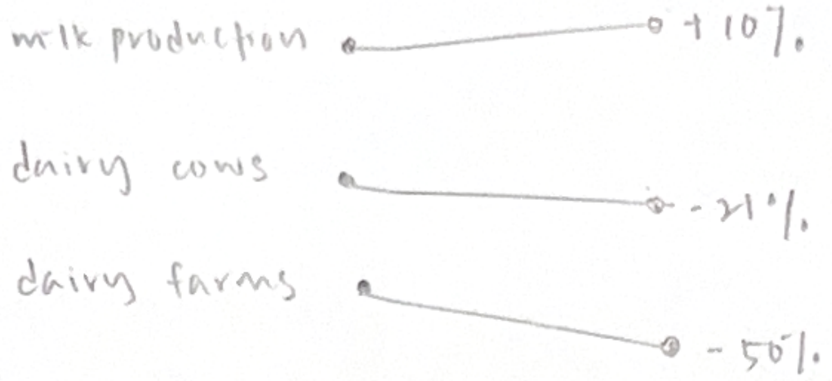

Production, domestic demand & overseas market

① ALL INDUSTRY TRANSFORMED. Fewer farms now support more milk through larger herds and higher output.

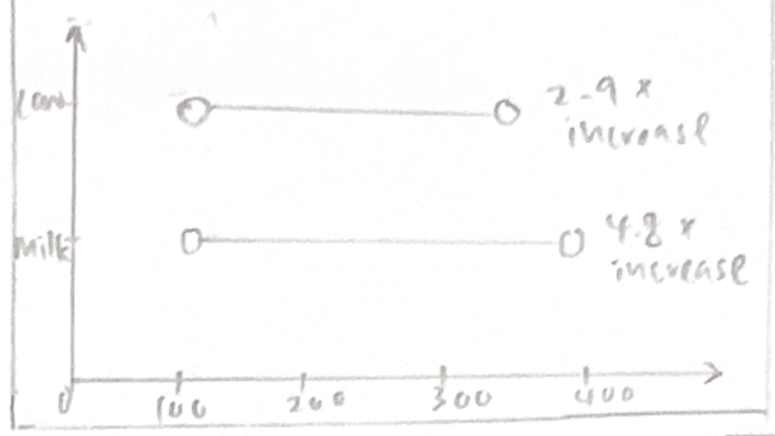

Annual Milk Production

1990 → 2025 % change

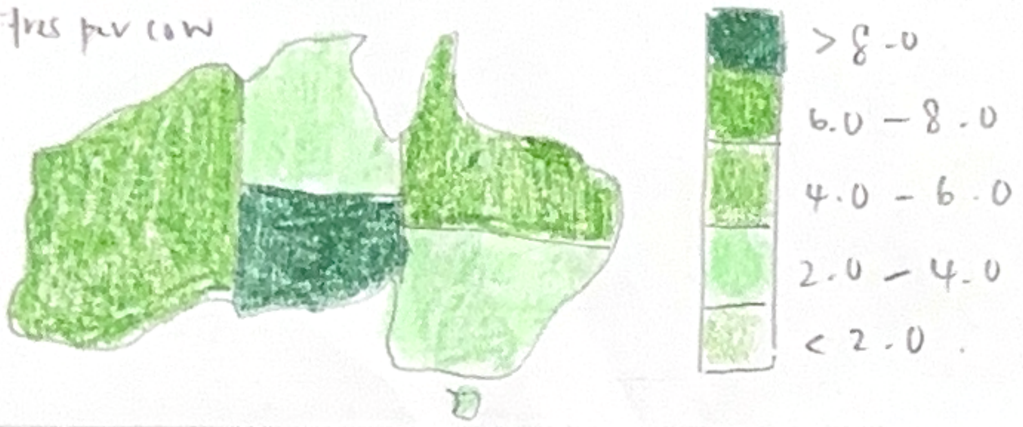

Larger herds, higher output.

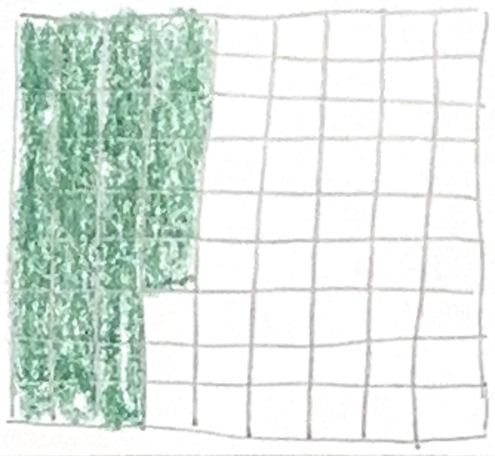

② GEOGRAPHY & SEASONS. High output per cow does not always mean larger milk industry

Milk per cow, 2024-25

litres per cow

Victoria: share of national milk production

36.5% of Austria's milk produced in Victoria

Change in milk production by region.
2024-25 compared with 2010-11

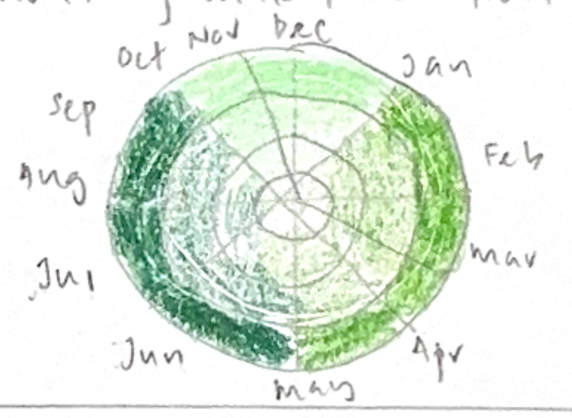

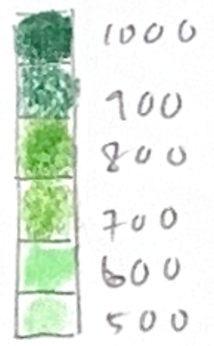

select year: 2021-22

Increase

Decrease

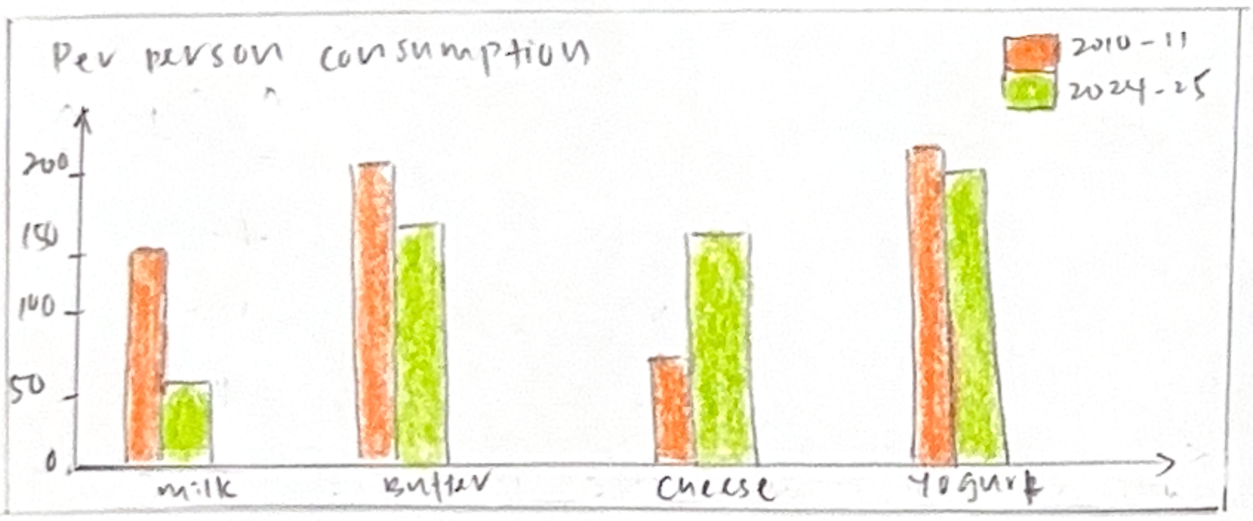

July - June Seasons.
monthly milk production (ML)

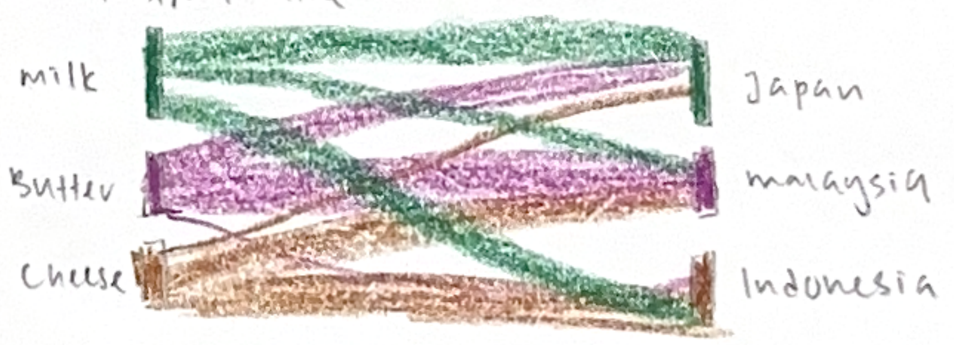

③ CHANGING DEMAND. Domestic consumption and export sales reveal different side of demand.

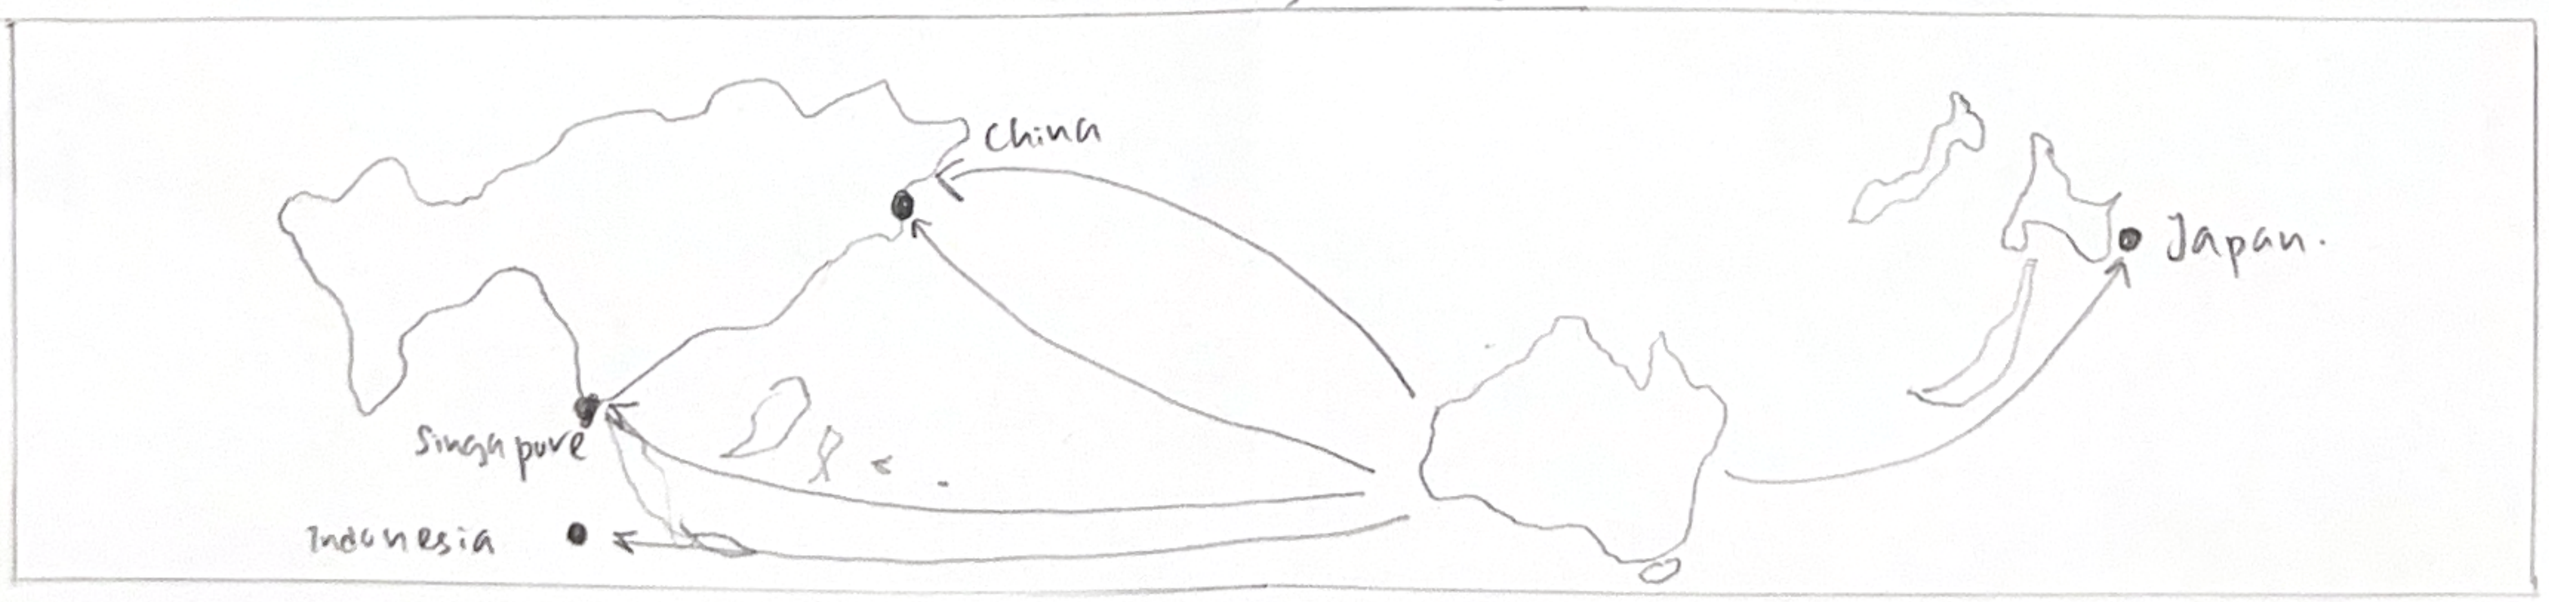

Per person consumption

products → export regions.
share of export value

④ GLOBAL MARKETS. More tonnes do no necessarily bring greater export value.

FEWER FARMS. LARGER HERDS. DIFFERENT MARKETS.
